Details of INCOIS Guest House Facilities

There are two on-campus guest houses that are built on 60-acres of greenery and co-located with the offices of INCOIS and ITCOOcean. Being run by a scientific establishment for students and trainers, the guest house facilities and services cannot be compared with commercial establishments such as hotels. Instead, the guest houses endeavor to offer a safe, clean and homely environment for long stays, with ample opportunities to network during and after the working hours.

There are 78 rooms with different configurations (Suites, Married Accommodation, Double Rooms) that are used to host trainers and trainees of various training programmes as well as interns and research fellows of INCOIS. All guest rooms are air-conditioned and have 1 Queen Bed or 2 Single Beds. Every room has an attached Western Toilet & Shower, Television, Wi-Fi connectivity, study table, wardrobe and an electric kettle. Potable drinking water is available at the guest houses through dispensers which participants are welcome to use.

Rooms and toilets will be cleaned, and linen will be changed twice-a-week. Guests intending to avail this service need to deposit the room key at the reception and inform the attendant. Common Laundry machines are available in the guest house for use by the guests. The guest house also has entertainment facilities such as common TV room, indoor badminton court, table tennis and a gymnasium for use by the guest.

Food for the guests will be prepared in the on-campus kitchen and served in the common dining room of the guest house. While it may be noted that the general style of cooking is Indian cuisine, INCOIS will make all efforts to customize the menu to cater multiple cuisines. Alcohol will not be served in the INCOIS guest house. If participants need a wider choice of food, they have option of using several restaurants available outside INCOIS campus or through food delivery Apps on a self-funded basis.

INCOIS will keep a car available at the guest house for use by the participants, should there be a need to visit the city for medical and other supplies. An attendant will be available at the guest house reception on a 24 x 7 basis to cater to any requests from the guests.
