National Tsunami Warning & Mitigation System

CHAIN and SOPs remain the same as the one in preparation

National Organisation of Exercise IOWave25

Preparatory meetings were organized between NDMO and NTWC to discuss the plan for the activities related to IOWave25.

It was decided that we participated in three of the four exercises:

1. **Fani Maore Volcano**: because this would be of our concern as it generates a local tsunami

2. **Makran Trench**: because it gives us a feelings of a regional tsunami threats

3. **Sumatra Trench**: Celebration of **WTAD**

(1) and (2) were planned to be table-top exercise and (3) as a full evacuation drill.

(1) and (2) were executed as planned but we could not conduct drill due to the political turmoil occurred all over the country.

The exercise was not meant to evaluate Tsunami Ready or similar indicators in Madagascar but to test the efficiency of the chain.

Exercise Participants

The **NTWC** and the **NDMO of Madagascar participated** in the **two table-top exercises** (Makran Trench and Fani Maore Volcano scenarios). Undergraduate students preparing their Master's degrees were also involved to help **developing new expertise** and **promote tsunami readiness.**

Lessons Learnt

- Data flow between NTWC and NDMO worked well

- NTWC did not receive any SMS and fax Mail from TSPs during the exercise

- The first tsunami wave arrived before the first bulletin for the case of **Fani Maore Volcano**
