@IOCARIBOECEAN

WESTERN TROPICAL ATLANTIC REGIONAL
REGION ATLÁNTICO TROPICAL OCCIDENTAL

A SUSTAINABLY HARVESTED AND PRODUCTIVE OCEAN

An Approach for all

"the science we need for the ocean we want"

Challenges facing the oceans: climate change, ocean acidification, fishing, habitat loss, LBS pollution, marine debris, shipping practices, offshore fossil fuels and hydrocarbon industries etc.

Today: The UN Decade provides the opportunity to put the system back on track. It is time to make the serious changes to address and even reverse these challenges.

Overarching vision: We should be: participatory, inclusive, transparent, and adaptive, We should consider: gender, traditional knowledge, cultural, SIDs , sustainability, education, free trade, governance, spatial planning, connectivity.

We should engage: National and regional organizations, governments, industry, NGO's, businesses, academics, resource users, young professionals, students, fishers, indigenous people etc
