THE WTA REGIONAL WORKSHOP

- ❑ To motivate the region
- ❑ To create a “movement” around ocean science
- ❑ Engaged non-traditional partners
- ❑ 1,000 participants
- ❑ Focus on the needs on individuals and communities
- ❑ No ‘science for science’s sake’

@IOCARIBEOCEAN

Wastewater Pollution Negatively Impacts Natural Capital

20%

The percentage of Caribbean wastewater that is collected¹

85%

The amount of wastewater estimated to be entering the Caribbean Sea untreated²

#1

Untreated Wastewater is the #1 direct source of pollution to Caribbean marine ecosystems³

Wastewater is a Multiple Stressor

Freshwater

Inorganic nutrients

Pathogens

Endocrine disruptors

Suspended solids

Sediments

Heavy metals

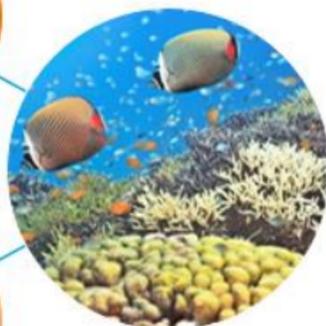

Revenue Streams + Expenditures

Nutrient enrichment >
algal blooms >
red tides > fish kills

- 1 in 4 Caribbean Jobs
- Up to 75% of GDP

Commercial Fisheries^{1,2}

Tourism³

+

Health Care⁶

Cholera
Gastroenteritis
Hepatitis

The Caribbean Sea generates more than US\$3 billion annually from tourism and fisheries.⁴

Points of Exposure

Consumption – Fish & Shellfish¹
Drinking Water – Groundwater, Surface Water⁶
Recreational Waters – Swimming, Snorkeling, Diving⁶
Airborne – Red Tides²

- IMPROVE UNDERSTANDING OF THE FLOW AND IMPACTS OF ALL POLLUTANTS IN THE WTA
- TRANSFORMING DECISION MAKING,
- FACILITATING TARGETED POLLUTION PREVENTION MEASURES
- MORE SUSTAINABLE USE OF OUR COASTAL AND MARINE RESOURCES

The science we need

One Planet, One Ocean

For The Ocean we Want

iocaribe.ioc-unesco.org

ioc.unesco.org - www.oceandecade.org

A large sea turtle is the central focus, swimming towards the viewer. Its head is in the foreground, showing its eyes and nostrils. The turtle's shell is a mix of green and brown with distinct scutes. Its flippers are extended outwards. The background is a deep blue ocean with several smaller, colorful fish (one large purple one with yellow fins, and two smaller purple ones) and some red coral-like plants. The overall scene is vibrant and clear.
