## **1 PURPOSE**

To report on the IOTWMS Communications Test conducted on 09 June 2021.

## **2 BACKGROUND**

Working Group 2 (WG2) of the Intergovernmental Coordination Group for the Indian Ocean Tsunami Warning and Mitigation System (ICG/IOTWMS), at its meeting in Hyderabad, India on 10-11 February 2011, decided that regular communications tests should be conducted between the Tsunami Service Providers (TSPs) and the National Tsunami Warning Centres (NTWCs) of the IOTWMS.

The objectives of the communications tests are to:

- a. Validate the TSP processes for disseminating tsunami bulletin notification messages to NTWCs.
- b. Validate the reception of the notification messages by NTWCs.
- c. Validate the access by NTWCs to TSP password-protected web sites containing bulletins, threat maps and tables of predicted arrival times and maximum wave amplitudes in real time.
- d. Validate the reporting by NTWCs of national warning status information back to TSPs, via a web-based warning status report form.

Four tests were conducted in 2011, and two tests have been conducted each year between 2012 and 2019. In 2020 only one test was conducted as the second test would have occurred in close proximity to Exercise IOWave20. This is the report of the twenty second test held on 9 June 2021. The next test is scheduled for 8 December 2021. Below is the test schedule:

<b>Test Number</b>	<b>Date</b>	<b>Status</b>
1	16 March 2011	Conducted
2	15 June 2011	Conducted
3	14 September 2011	Conducted
4	14 December 2011	Conducted
5	13 June 2012	Conducted
6	12 December 2012	Conducted
7	12 June 2013	Conducted
8	11 December 2013	Conducted
9	11 June 2014	Conducted
10	10 December 2014	Conducted
11	10 June 2015	Conducted
12	9 December 2015	Conducted
13	8 June 2016	Conducted
14	14 December 2016	Conducted
15	14 June 2017	Conducted
16	13 December 2017	Conducted
17	13 June 2018	Conducted
18	12 December 2018	Conducted
19	12 June 2019	Conducted
20	11 December 2019	Conducted
21	10 June 2020	Conducted
22	9 June 2021	Conducted
23	8 December 2021	Planned

Notes:

- a. All test reports are available on the IOC website at <http://www.ioc-tsunami.org/>.
- b. In the 2011 tests TSPs issued 12 messages each within a 3-hour period. Since 2012 the TSPs have issued 4 messages each within a 45-minute period.
- c. In addition to the communication tests, five IOTWMS exercises have been conducted since 2011:
  - IOWave11 (12 October 2011)
  - IOWave14 (9-10 September 2014)
  - IOWave16 (7-8 September 2016)
  - IOWave18 (4-5 September 2018)
  - IOWave20 (6-20 October 2020)

### 3 TEST DETAILS

The details of the procedures used in the 9 June 2021 test are described in the document “IOTWMS Communications Test 9 June 2021 Technical Manual” distributed to NTWCs and TSPs by the ICG/IOTWMS Secretariat on 24 May 2021.

#### Test Earthquake Event Scenario:

Magnitude: 9.0Mwp  
Depth: 10 km  
Date: 9 June 2021  
Origin Time: 06:00 UTC  
Latitude: 6.94S  
Longitude: 104.70E  
Location: Sunda Strait, Indonesia

As in previous tests, each participating country was requested to complete a Communications Test Log during the test, recording the time and method of reception of test messages at the NTWC, the NTWC’s ability to access the TSP websites and TSP-Indonesia Warning Receiver System, and the time of the NTWC’s reporting of national warning status information. For the second time, the Test Log was available for completion online. The Test Logs are the primary source of information for this report and are now archived on the Alchemer online survey platform (previously named SurveyGismo).

### 4 TEST PARTICIPATION

Twenty-one (21) IOTWMS Member States participated in the test. This is slightly lower than the average participation rate of 22 Member States across the 22 tests conducted so far. The highest participation rate has been 26 participants and the lowest participation rate has been 17 participants.

The participants in this test were:

- TSPs - Australia, India, Indonesia
- NTWCs – Australia, Bangladesh, Comoros, France (Indian Ocean Territories), India, Indonesia, Kenya, Madagascar, Malaysia, Mauritius, Mozambique, Myanmar, Oman, Pakistan, Seychelles, Singapore, South Africa, Sri Lanka, Thailand, United Arab Emirates and Yemen.

Four active IOTWMS Member States did not participate in the communications test.

Table 1, Chart 1 and Chart 2 show the participation by Member States in all tests conducted so far.

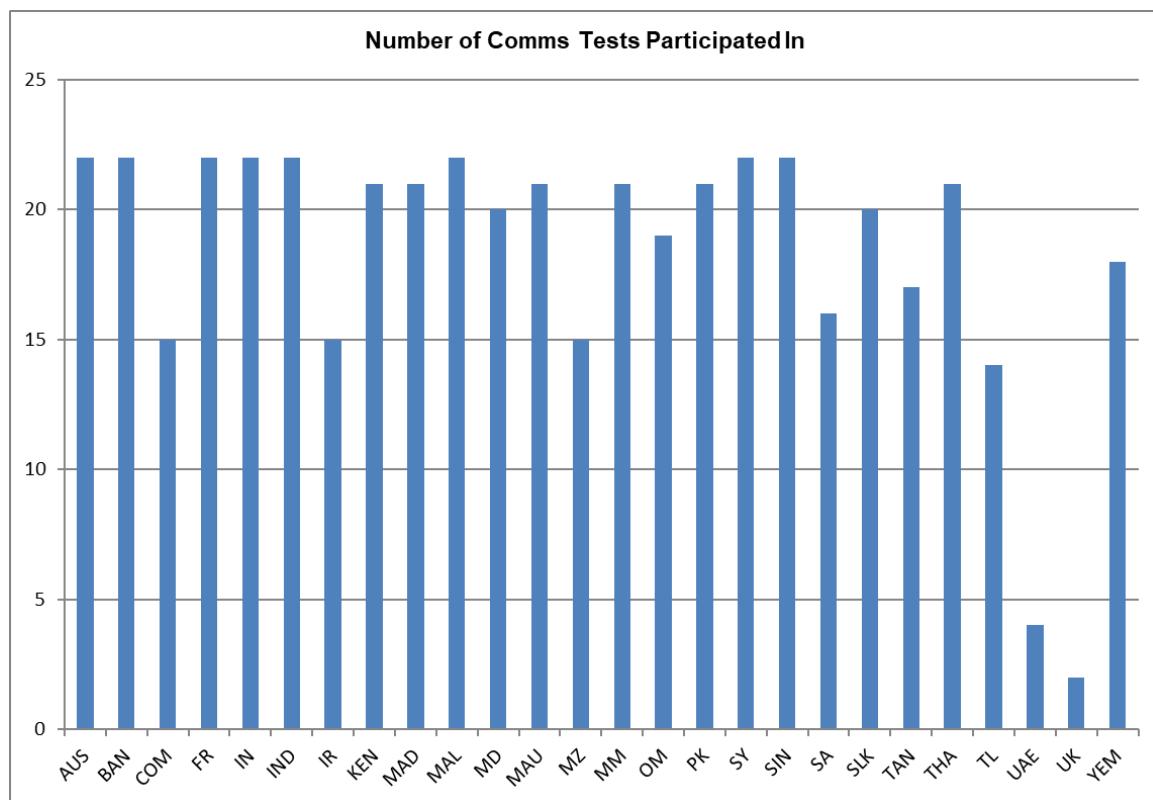

**Table 1: Log of Member State Participation in all Tests**

Test	AUS	BAN	COM	FR	IN	IND	IR	KEN	MAD	MAL	MD	MAU	MZ	MM	OM	PK	SY	SIN	SA	SLK	TAN	THA	TL	UAE	UK	YEM	Total

**Chart 1: Number of Tests Participated in by Member State**

**Chart 2: Number of Member States in Each Test**

## 5 MESSAGE DISSEMINATION AND RECEPTION RESULTS

### 5.1 Message Dissemination

**Dissemination Media:** All TSPs issued their test messages via GTS, email, fax and SMS.

**Issue Times:** See Table 2 for the actual issue times of each TSP message compared to the scheduled issue times.

**Table 2: TSP Test Message Issue Times (UTC)**

TSP	Test Start <b>0600</b>	Message 1 <b>0605</b>	Message 2 <b>0615</b>	Message 3 <b>0630</b>	Message 4 <b>0645</b>
Australia	06:00	06:05	06:15	06:30	06:45
India	06:00	06:06	06:17	06:30	06:44
Indonesia	06:00	06:05	06:15	06:30	06:45

**Addresses:** The NTWC fax, email and SMS addresses used by the TSPs were those contained in updates to the IOTWMS NTWC Contact Databases supplied to the TSPs by the ICG/IOTWMS Secretariat on 02 June2021.

All messages sent by the TSPs are given in Appendix H.

### 5.2 Message Reception

Refer to Appendices A, B, C and D for tables listing the arrival times of the GTS, fax, email and SMS messages received by each NTWC, as reported in their Test Logs. Also refer to Table 3 and Chart 3 for summary figures across all NTWCs.

#### 5.2.1 GTS

The overall GTS reception rate was 77%, which was slightly higher than the past two tests.

Seventeen (17) of the 21 NTWCs received GTS messages. Bangladesh, Comoros, Madagascar and Yemen did not receive GTS messages from any TSP (noting that Madagascar have no GTS connection), while South Africa didn't receive any GTS messages from TSP Indonesia. Maldives not received first three messages from Indonesia. Maldives and Pakistan not received start-up message from TSP India. Maldives not received last message from TSP Australia. All other NTWCs, received GTS messages from all 3 TSPs.

GTS message delay times continued to be low in this test, with most messages received within 1-3 minutes of issuing. The longest delay was 55 minutes for most NTWCs to receive TSP Indonesia bulletin-1 notification message.

#### 5.2.2 Fax

The overall fax reception rate was 21%, lowest ever from all communication tests.

Only Eleven (11) of the 21 NTWCs reported receiving fax messages, with TSP Australia's messages being received by 8 NTWCs, India's by 6 NTWCs and Indonesia's by 2 NTWCs.

Fax message delay times mostly varied between a few minutes and 15minutes, with the longest delay being 178 minutes for a TSP Indonesia message received by Oman.

### **5.2.3 Email**

The overall email reception rate in this test was 83%, which was higher than the past two tests. All 21 NTWCs received email notifications from at least one TSP. Emails from TSP Australia were received by 20 NTWCs, emails from TSP India were received by 19 NTWCs and TSP Indonesia were received by 16 NTWCs.

Email message delay times continue to be very low, with almost all email messages received within 1 to 3 minutes of the issue time. The longest delay was 55 minutes to Australia from TSP Indonesia.

### **5.2.4 SMS**

The overall SMS message reception rate in this test was 60%, lower than the last 4 tests but close to the average rate.

In this test eighteen (18) of the 21 NTWCs received SMS messages, France, Pakistan and Sri Lanka did not receive SMS messages from any TSP. France (Indian Ocean Territories) does not wish to receive SMS messages.

TSP Australia's SMS messages were received by 16 of the 21 NTWCs, and TSP India's were received by 13 NTWCs and TSP Indonesia's were received by 12 NTWCs.

As with email, most SMS messages were received very quickly, typically within 1 to 3 minutes. The longest delay was 217minutes for a message received by Comoros.

## **6 WEB ACCESS AND REPORTING RESULTS**

Refer to Table 3 and Chart 4 for summary figures of web access and reporting across all NTWCs.

### **6.1 Web Access**

Refer to Appendix E for a table of web accesses reported by each NTWC. In this test the web access overall success rate was 86%, up 7% from the 79% in the previous test and slightly higher than the average of around 83%. This is still under the highest-ever rate of 94%.

Twenty (20) of the 21 NTWCs were able to access at least one TSP website during the test, compared with 24 of 26 in the previous test. Yemen did not access any of the TSP websites.

### **6.2 Web Reporting**

Refer to Appendix F for a table of NTWC web status reports lodged, as reported by the NTWCs. Also refer to Figures 1, 2a, 2b, 3a, 3b, 4a and 4b of Appendix F for snapshots of the TSP India and TSP Australia public NTWC Status Display webpages following transmission of each of the four test messages.

In this test, 13 of the 21 NTWCs reported that they lodged web status reports. This is a rate of 62%, up 6% from the 54% in the previous test and slightly higher than the average of around 59%, but well under the highest-ever rate of 77%.

### **6.3 TSP-Indonesia WRS Access**

Refer to Appendix G for a table of TSP-Indonesia WRS accesses reported by each NTWC. In this test the TSP-Indonesia WRS access overall success rate was 71%.

Four (4) NTWCs did not report TSP-Indonesia WRS access. This is the first time that the TSP-Indonesia WRS was used in a Communications Test.

In general, NTWCs gave the positive feedback and could access the TSP-Indonesia WRS very well. Comoros reported of not having attempted access yet. Yemen reported difficulty accessing due to poor internet service quality.

## 7 RESULTS ASSESSED AGAINST OBJECTIVES

### 7.1 Validate TSP dissemination processes for tsunami bulletin notification messages

All three TSPs successfully issued their test messages according to the Test Timeline and via all four specified communications media: GTS, fax, email and SMS.

### 7.2 Validate reception of notification messages by NTWCs

- Email continues to be the most successful communications medium, with 83% of the TSP email messages being received by NTWCs in this test, and all NTWCs received email messages from at least one TSP.
- The GTS message reception at 77% was up on the previous test and remains the second-most successful delivery medium.
- The SMS message reception is steady at 60%, around the average for the previous few years but well below its highest-ever 80% figure for the IOWave18 exercise.
- The Fax message reception was lowest at 21% in this test, compared with all communication tests.

### 7.3 Validate access by NTWCs to TSP password-protected web sites

Web site access increased slightly to 86% in this test compared with 79% of the previous test, slightly higher than the long-term average of around 83% since 2011. Twenty (20) of the 21 NTWCs were able to access at least one TSP website.

### 7.4 Validate reporting by NTWCs of national warning status information

NTWC status report lodgement as reported by NTWCs is 62%, higher than the previous 4 communications tests and in line with the longer-term average

## 8 COMPARISON WITH PREVIOUS TESTS

The results of this test in comparison with previous tests are summarised in Table 3 and Charts 3 and 4 below. Twenty-one (21) IOTWMS Member States participated in this 22<sup>nd</sup> IOTWMS Communications Test, which is slightly lower than the participation average of 22 Member States. This test demonstrated the continuing strength of email as the primary TSP delivery mechanism for notifying NTWCs of bulletin updates, followed by GTS and SMS as the next most reliable mechanisms. The historically low fax reception rate of only 21% calls for a review of the validity of fax numbers and necessity of providing such delivery channel.

This is the first time that the TSP Indonesia's WRS system was tested. The feedback was mostly positive from all those 15 NTWCs who accessed the system, suggestion this could be a viable alternative or addition to the current four delivery channels of GTS, Email, SMS and fax.

On the TSP webpage access and national warning status reporting, this test showed improvement from the recent communications tests and above the respective longer-term averages.

**Table 3: Test Results Comparison**

Test Date:	16-Mar-11 (21 NTWCs)		15-Jun-11 (23 NTWCs)		14-Sep-11 (23 NTWCs)		14-Dec-11 (19 NTWCs)		13-Jun-12 (21 NTWCs)		12-Dec-12 (17 NTWCs)		12-Jun-13 (20 NTWCs)		11-Dec-13 (21 NTWCs)		11-Jun-14 (23 NTWCs)

Notes on Table 3:

- Percentages are based on the number of NTWCs that:
  - Received each TSP's notification messages
  - Were able to access TSP web pages
  - Were able to lodge NTWC Warning Status Reports via a TSP web page.
- "Max Delay" is the highest message delay reported across all NTWCs for each TSP's messages.
- "-“ = not issued in test
- "n/a" = not applicable

### Chart 3: Message Delivery Success Rates

### Chart 4: Web Access and Status Reporting Success Rates

## 9 SUMMARY OF ISSUES ARISING

The NTWC receipt of TSP messages by NTWCs, access to TSP websites, and status reporting is summarized in Table 4 below. Follow-up is required to ensure all NTWCs receive TSP messages where ever practical and be able to access the TSP websites. Furthermore, all NTWCs should be encouraged to report their national status during tsunami events and exercises.

**Table 4: Summary of Message Receipt and Website Access and Reporting**

#### Notes:

7. - = message not received or not reported
8. "Tot" = number of NTWCs who received message, out of 21
9. "%" = percentage of NTWCs who received message
10. Message(s) with maximum time delay for each TSP are highlighted in yellow. Highest overall delay =55 minutes
11. The NTWCs in Iran and Madagascar are not connected to the GTS.

Home / Tsunami Early Warnings / NTWCs Feedback Summary

**Summary of the Current Threat Status as reported by the NTWCs**

This page displays the summary of feedback received from individual NTWCs regarding the Threat Status in their area of responsibility. Within 24 hrs of the current event ending (issue of FINAL bulletin by RTSPs), if no further NTWC feedback is received, this page will be cleared to indicate no warnings.

**Legend**

- Threat Level 0: No impact expected, no flooding, no currents.
- Threat Level 1: There is a potential for tsunami impact, but given the travel time, no response of the public is necessary at the moment.
- Threat Level 2: Threat to coastal marine areas due to strong currents and oscillations in sea level.
- Threat Level 3: Threat of tsunami inundation to land areas.
- Cancellation/All Clear

**Summary of the Current Threat Status as reported by the NTWCs**

This page displays the summary of feedback received from individual NTWC's regarding the Threat Status in their area of responsibility. Within 24 hrs of the current event ending (issue of FINAL bulletin by RTSPs), if no further NTWC feedback is received, this page will be cleared to indicate no warnings.

Legend

- Threat Level 0: No impact expected, no flooding, no currents.
- Threat Level 1: There is a potential for tsunami impact, but given the travel time, no response of the public is necessary at the moment.
- Threat Level 2: Threat to coastal marine areas due to strong currents and oscillations in sea level.
- Threat Level 3: Threat of tsunami inundation to land areas.
- Cancellation/All Clear

2. 0= no
3. -= not reported
4. "Tot" = number of NTWCs who accessed TSP web page, out of 21
5. "%" = percentage of NTWCs who accessed web page

### Comments:

Australia	It looked good and functioned well. As a personal preference I would have liked the alarm tone to have more of a tsunami theme (e.g. tsunami siren etc.), but my colleague didn't mind it.
Comoros	We have not experienced it
Indonesia	All system on the TSP-Indonesia Warning Receiver System running well, the web is user friendly and attractive.
Kenya	The Receiver system is good and can be used for display.
Malaysia	Nice interface
Mauritius	Scenario for Tsunami Travel Time could be visualised on TSP-Indonesia Warning Receiver System
Myanmar	NTWC of Myanmar can receive all messages in time from website.
Oman	The System was accessible and working well, but the audio was not tested (because the audio was not enabled in the internet browser).
Seychelles	A very good website with audio message when bulletins are issued.
South Africa	WRS was accessible online from at least 05:58UTC onwards, throughout the test
Sri Lanka	Thanks for the TSP-Indonesia. The notification alarm is delivering only one time. It is suggested that repeat at least 3 or 4 times.
UAE	Congratulation on the New Warning system, it's really great. The dynamic and interactive warnings maps is more efficient. There was no sound for the warnings, however when we open it first time the sound was works.
Yemen	We have difficulty to access the web site by PC or mobile.! May be due to internet service quality

TEST TSUNAMI BULLETIN NUMBER 1 (TYPE-I EARTHQUAKE BULLETIN)
IOTWMS TSUNAMI SERVICE PROVIDER AUSTRALIA (JATWC)
ISSUED AT 0605 UTC Wednesday 09 June 2021
-----
```

... EARTHQUAKE BULLETIN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### **1. EARTHQUAKE INFORMATION**

IOTWMS-TSP AUSTRALIA has detected an earthquake with the following preliminary information:

Magnitude: 9.0 Mwp  
Depth: 10km  
Date: 09 Jun 2021  
Origin Time: 0600 UTC  
Latitude: 6.94S  
Longitude: 104.70E  
Location: SUNDA STRAIT, INDONESIA

#### **2. EVALUATION**

Based on historical data and tsunami modelling, this earthquake may be capable of generating a tsunami affecting the Indian Ocean region.  
IOTWMS-TSP AUSTRALIA will monitor sea level gauges near the earthquake to determine if a tsunami was generated and will issue further bulletins for this event.

Further information on this event will be available at:  
<http://reg.bom.gov.au/tsunami/rtsp>

#### **3. ADVICE**

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

#### **4. OTHER INDIAN OCEAN TSUNAMI SERVICE PROVIDERS:**

Other IOTWMS-TSPs may issue additional information at:  
IOTWMS-TSP INDIA: <http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>  
IOTWMS-TSP INDONESIA: <http://rtsp.bmkg.go.id>

```

TEST TSUNAMI BULLETIN NUMBER 2 (TYPE-II THREAT ASSESSMENT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER AUSTRALIA (JATWC)  
ISSUED AT 0615 UTC Wednesday 09 June 2021  
-----

... POTENTIAL TSUNAMI THREAT IN THE INDIAN OCEAN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP AUSTRALIA has detected an earthquake with the following details:

Magnitude: 9.0 Mwp  
Depth: 10km  
Date: 09 Jun 2021  
Origin Time: 0600 UTC  
Latitude: 6.94S  
Longitude: 104.70E  
Location: SUNDA STRAIT, INDONESIA

#### 2. EVALUATION

Earthquakes of this size are capable of generating tsunamis. However, so far there is no confirmation about the triggering of a tsunami.

An investigation is under way to determine if a tsunami has been triggered. This TSP will monitor sea level gauges and report if any tsunami wave activity has occurred.

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

#### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone, and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than 0.5m at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

#### 4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

#### 5. UPDATES

Additional bulletins will be issued by IOTWMS-TSP AUSTRALIA for this event as more information becomes available.

Other IOTWMS-TSPs may issue additional information at:

TSP INDIA: <http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>

TSP INDONESIA: <http://rtsp.bmkg.go.id>

```

... CONFIRMED TSUNAMI THREAT IN THE INDIAN OCEAN...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP AUSTRALIA has detected an earthquake with the following details:

Magnitude: 9.0 Mwp  
Depth: 10km  
Date: 09 Jun 2021  
Origin Time: 0600 UTC  
Latitude: 6.94S  
Longitude: 104.70E  
Location: SUNDA STRAIT, INDONESIA

#### 2. EVALUATION

Sea level observations have confirmed that a TSUNAMI WAS GENERATED.  
Maximum wave amplitudes observed so far:

Bengkunat	INDONESIA	5.52S 104.21E	1.30m	09 Jun 06:15 UTC
-----------	-----------	---------------	-------	------------------

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

#### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone, and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than 0.5m at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

TEST TSUNAMI BULLETIN NUMBER 4 (TYPE-IV FINAL BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER AUSTRALIA (JATWC)  
ISSUED AT 0645 UTC Wednesday 09 June 2021  
-----

... FINAL TSUNAMI BULLETIN FOR THE INDIAN OCEAN ...

#### **1. EARTHQUAKE INFORMATION**

IOTWMS-TSP AUSTRALIA has detected an earthquake with the following details:

Magnitude: 9.0 Mwp  
Depth: 10km  
Date: 09 Jun 2021  
Origin Time: 0600 UTC  
Latitude: 6.94S  
Longitude: 104.70E  
Location: SUNDA STRAIT, INDONESIA

#### **2. EVALUATION**

Data from sea-level gauges confirmed that a tsunami was generated.

The expected period of significant tsunami waves is now over for all threatened Indian Ocean countries, based on IOTWMS-TSP AUSTRALIA modelling.

Because local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities. Please be aware that dangerous currents can continue for several hours after the main tsunami waves have passed.

#### **3. TSUNAMI WAVE OBSERVATIONS**

Listed below are maximum wave amplitudes recorded at the specified locations. Note that wave amplitude is measured relative to normal sea level; it is NOT the crest-to-trough wave height.

Bengkunat	INDONESIA	5.52S 104.21E	4.50m	09 Jun 06:15 UTC
TanjungLesung	INDONESIA	6.50S 105.50E	2.10m	09 Jun 06:30 UTC

#### **4. ADVICE**

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

#### **5. UPDATES**

No further bulletins will be issued by IOTWMS-TSP AUSTRALIA for this event unless additional information becomes available.

Other IOTWMS-TSPs may issue additional information at:

TSP INDIA: <http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>

TSUNAMI BULLETIN NUMBER 1 (TYPE-I EARTHQUAKE BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDIA (ITEWC)  
ISSUED AT 0605 UTC WEDNESDAY 09 JUNE 2021

... EARTHQUAKE BULLETIN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### **1. EARTHQUAKE INFORMATION**

IOTWMS-TSP INDIA has detected an earthquake with the following preliminary information:

Magnitude: 9.0 M  
Depth: 10 km  
Date: 09 JUN 2021  
Origin Time: 0600UTC  
Latitude: 6.94 S  
Longitude: 104.7 E  
Location: SUNDA STRAIT, INDONESIA

#### **2. EVALUATION**

Based on historical data and tsunami modelling, this earthquake may be capable of generating a tsunami affecting the Indian Ocean region. IOTWMS-TSP INDIA will monitor sea level gauges near the earthquake to determine if a tsunami was generated and will issue further bulletins for this event. Further information on this event will be available at:

<http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>

#### **3. ADVICE**

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

#### **4. OTHER INDIAN OCEAN TSUNAMI SERVICE PROVIDERS:**

Other IOTWMS-TSPs may issue additional information at:  
IOTWMS-TSP AUSTRALIA: <http://reg.bom.gov.au/tsunami/rtsp/>  
IOTWMS-TSP INDONESIA: <http://rtsp.bmkg.go.id>

TSUNAMI BULLETIN NUMBER 2 (TYPE-II THREAT ASSESSMENT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDIA (ITEWS)  
ISSUED AT 0616 UTC Wednesday 09 June 2021

... POTENTIAL TSUNAMI THREAT IN THE INDIAN OCEAN ...  
This bulletin applies to areas within and bordering the Indian Ocean.  
It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and  
Mitigation System (IOTWMS).

#### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP INDIA has detected an earthquake with the following preliminary information:

Magnitude: 9 M  
Depth: 10 km  
Date: 09 JUN 2021  
Origin Time: 0600 UTC  
Latitude: 6.94 S  
Longitude: 104.7 E  
Location: SUNDA STRAIT, INDONESIA

#### 2. EVALUATION

Earthquakes of this size are capable of generating tsunamis. However, so far there is no confirmation about the triggering of a tsunami.  
An investigation is under way to determine if a tsunami has been triggered.  
This TSP will monitor sea level gauges and report if any tsunami wave activity has occurred.

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

#### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone (or a different threshold nominated by an NTWC), and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than the threshold amplitude at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

#### 4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

#### 5. UPDATES

Additional bulletins will be issued by TSP INDIA for this event as more information becomes available.

Other TSPs may issue additional information at:

TSP AUSTRALIA: <http://reg.bom.gov.au/tsunami/rtsp/>

TSP INDIA: <http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>

#### 6. CONTACT INFORMATION

TSUNAMI BULLETIN NUMBER 3 (TYPE-III CONFIRMED THREAT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDIA (ITEWS)  
ISSUED AT 0629 UTC Wednesday 09 June 2021

... CONFIRMED TSUNAMI THREAT IN THE INDIAN OCEAN ...  
This bulletin applies to areas within and bordering the Indian Ocean.  
It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and  
Mitigation System (IOTWMS).

#### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP INDIA has detected an earthquake with the following preliminary information:

Magnitude: 9 M  
Depth: 10 km  
Date: 09 JUN 2021  
Origin Time: 0600UTC  
Latitude: 6.94 S  
Longitude: 104.7 E  
Location: SUNDA STRAIT, INDONESIA

#### 2. EVALUATION

Sea level observations have confirmed that a TSUNAMI WAS GENERATED.  
Maximum wave amplitudes observed so far:

Christmas Island(AUSTRALIA) 10.4 S 105.67 E 0616z 09 Jun 2021 5.2m

#### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone (or a different threshold nominated by an NTWC), and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than the threshold amplitude at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

#### 4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

#### 5. UPDATES

Additional bulletins will be issued by IOTWMS-TSP INDIA for this event as more information becomes available

TEST TSUNAMI BULLETIN NOTIFICATION MESSAGE NUMBER 4 IOTWMS TSUNAMI SERVICE PROVIDER  
INDIA (ITEWC) ISSUED AT 0644 UTC WEDNESDAY 09 JUNE 2021

TO: INDIAN OCEAN NATIONAL TSUNAMI WARNING CENTRES (NTWC)  
FROM: IOTWMS-TSP INDIA

#### NOTIFICATION:

IOTWMS-TSP INDIA HAS JUST ISSUED TSUNAMI BULLETIN NUMBER 4 FOR THE INDIAN OCEAN,  
BASED ON THE FOLLOWING EARTHQUAKE EVENT:

Magnitude : 9.0 M  
Depth : 10.0 km  
Date : 09 Jun 2021  
Origin Time : 0600 UTC  
Latitude : 6.94 S  
Longitude : 104.70 E  
Location : Sunda Strait, Indonesia

TO VIEW THE BULLETIN GO TO THE IOTWMS-TSP INDIA WEBSITE AT:

TSUNAMI BULLETIN NUMBER 1 (TYPE-I EARTHQUAKE BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDONESIA (InaTEWS-BMKG)  
issued at 0605 UTC, Jun 09, 2021

---

... EARTHQUAKE BULLETIN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### **1. EARTHQUAKE INFORMATION**

IOTWMS-TSP INDONESIA has detected an earthquake with the following preliminary information:

Magnitude : 9.0 Mwp  
Depth : 10km  
Date : 09 Jun 2021  
Origin Time: 06:00:00 UTC  
Latitude : 6.94S  
Longitude : 104.70E  
Location : Sunda Strait, Indonesia

#### **2. EVALUATION**

Based on historical data and tsunami modelling, this earthquake may be capable of generating a tsunami affecting the Indian Ocean region. IOTWMS-TSP INDONESIA will monitor sea level gauges near the earthquake to determine if a tsunami was generated and will issue further bulletins for this event.

Further information on this event will be available at:  
<http://rtsp.bmkg.go.id>

#### **3. ADVICE**

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

#### **4. OTHER INDIAN OCEAN TSUNAMI SERVICE PROVIDERS:**

Other IOTWMS-TSPs may issue additional information at:

IOTWMS-TSP AUSTRALIA: <http://reg.bom.gov.au/tsunami/rtsp/>

IOTWMS-TSP INDIA: <https://tsunami.incois.gov.in/TEWS/COMMSRegional>

#### **5. CONTACT INFORMATION**

-----  
TSUNAMI BULLETIN NUMBER 2 (TYPE-II THREAT ASSESSMENT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDONESIA (InaTEWS-BMKG)  
issued at 0615 UTC, Jun 09, 2021

... POTENTIAL TSUNAMI THREAT IN THE INDIAN OCEAN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### 1. EARTHQUAKE INFORMATION (updated)

IOTWMS-TSP INDONESIA has detected an earthquake with the following details:

Magnitude : 9.0 Mwp (REVISED)  
Depth : 10km  
Date : 09 Jun 2021  
Origin Time: 06:00:00 UTC  
Latitude : 6.94S  
Longitude : 104.70E  
Location : Sunda Strait, Indonesia

#### 2. EVALUATION

Earthquakes of this size are capable of generating tsunamis. However, so far there is no confirmation about the triggering of a tsunami.

An investigation is under way to determine if a tsunami has been triggered. This TSP will monitor sea level gauges and report if any tsunami wave activity has occurred.

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

#### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone (or a different threshold nominated by an NTWC), and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than the threshold amplitude at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

TSUNAMI BULLETIN NUMBER 3 (TYPE-III CONFIRMED THREAT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDONESIA (InaTEWS-BMKG)  
issued at 0630 UTC, Jun 09, 2021

... CONFIRMED TSUNAMI THREAT IN THE INDIAN OCEAN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### 1. EARTHQUAKE INFORMATION (updated)

IOTWMS-TSP INDONESIA has detected an earthquake with the following details:

Magnitude : 9.0 Mwp (REVISED)  
Depth : 10km  
Date : 09 Jun 2021  
Origin Time: 06:00:00 UTC  
Latitude : 6.94S  
Longitude : 104.70E  
Location : Sunda Strait, Indonesia

#### 2. EVALUATION

Sea level observations have confirmed that a TSUNAMI WAS GENERATED.

Maximum wave amplitudes observed so far:

LOCATION	COUNTRIES	LAT	LON	AMPL (m)	TIME (UTC)	DATE
Sebesi Island	INDONESIA	5.94S	105.51E	13.3	06:00	Jun 09, 2021
Marina Jambu	INDONESIA	6.19S	105.84E	9.3	06:00	Jun 09, 2021
Christmas Island	AUSTRALIA	10.43S	105.67E	11.8	06:15	Jun 09, 2021
Pangandaran	INDONESIA	7.75S	108.50E	10.7	06:19	Jun 09, 2021
Cilacap	INDONESIA	7.75S	109.00E	7.4	06:26	Jun 09, 2021

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

#### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone (or a different threshold nominated by an NTWC), and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than the threshold amplitude at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

-----  
TSUNAMI BULLETIN NUMBER 4 (TYPE-IV FINAL BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDONESIA (InaTEWS-BMKG)  
issued at 0645 UTC, Jun 09, 2021

... FINAL TSUNAMI BULLETIN FOR THE INDIAN OCEAN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP INDONESIA detected an earthquake with the following details:

Magnitude : 9.0 Mwp (REVISED)  
Depth : 10km  
Date : 09 Jun 2021  
Origin Time: 06:00:00 UTC  
Latitude : 6.94S  
Longitude : 104.70E  
Location : Sunda Strait, Indonesia

#### 2. EVALUATION

Data from sea-level gauges confirmed that a tsunami was generated.

The expected period of significant tsunami waves is now over for all threatened Indian Ocean countries, based on IOTWMS-TSP INDONESIA modelling.

Because local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities. Please be aware that dangerous currents can continue for several hours after the main tsunami waves have passed.

#### 3. TSUNAMI WAVE OBSERVATIONS

Listed below are maximum wave amplitudes recorded at the specified locations. Note that wave amplitude is measured relative to normal sea level; it is NOT the crest-to-trough wave height.

LOCATION	COUNTRIES	LAT	LON	AMPL(m)	TIME (UTC)	DATE
Sebesi Island	INDONESIA	5.94S	105.51E	13.3	06:00	Jun 09, 2021
Marina Jambu	INDONESIA	6.19S	105.84E	9.3	06:00	Jun 09, 2021
Christmas Island	AUSTRALIA	10.43S	105.67E	11.8	06:15	Jun 09, 2021
Pangandaran	INDONESIA	7.75S	108.50E	10.7	06:19	Jun 09, 2021
Cilacap	INDONESIA	7.75S	109.00E	7.4	06:26	Jun 09, 2021

#### 4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

#### 5. UPDATES

No further bulletins will be issued by IOTWMS-TSP INDONESIA for this event unless additional information becomes available.

Other IOTWMS-TSPs may issue additional information at:  
IOTWMS-TSP AUSTRALIA: <http://reg.bom.gov.au/tsunami/rtsp/>  
IOTWMS-TSP INDIA: <http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>
