Report on Real-Time Data Base (KHOA, Republic of Korea)

10 March 2025 Hyeongyu Shin, Peter YOU

Oceanographic Observation Department, Korea Hydrographic and Oceanographic Agency

1. Status of Korea Oceanographic Observation Network

2. Real-time Ocean Data Processing

3. Service to public

4. Future plans

01 Status of Korea Oceanographic Observation Network

O1 Status of Korea Oceanographic Observation Network

- KHOA's 139 Stations (Present)
- Tidal Station: 54
- Ocean Station: 2
- Ocean Buoy: 36
- HF-Radar: 44 (16 areas)
- Ocean Research Station: 3

Observed Data

- Oceanographic: sea level, wave, currents, water temperature, salinity
- Meteorology: wind speed, air temperature, air pressure
 - \Rightarrow All acquired data is serviced in **real-time**

Tide Observation

Station	West	South	East	Total
Tidal Station	27	19	8	
Ocean Station	-	2	-	59
Ocean Research Station	2	1	-	
Observation Period	West	South	East	Total
More than 19 years	14	14	6	34
Less than 19 years	15	8	2	25

Ocean Observation Buoy

< Buoy in Offshore Area > - offshore buoy : 10 stations

> < Buoy in Major Fairway > - coastal buoy: 3 stations - ATON buoy: 13 stations

< Buoy for detecting Rip Current > - coastal buoy: 10 stations

Current Observation – HF Radar

< 16 area / 44 radars (site) >

- 42 Mhz: 15 Site
- 25 Mhz: 20 Site
- 13 Mhz: 7 Site
- 5 Mhz: 2 Site

Ocean Research Station

①Ongjin Socheongcho ②Sinan Gageocho ③IEODO

02 Real-time Ocean Data Processing

02 Real-time Ocean Data Processing

Data Quality Control (2 stages)

1st Quality Control (QC)

- Check the overall of data
- Time, location, error, variation, spike, statistic, delay, power, regional range, seasonal range, global range

2nd Quality Control (QC)

- Re examine the result of last month's 1st QC
- Compare the past data and the data from nearby stations

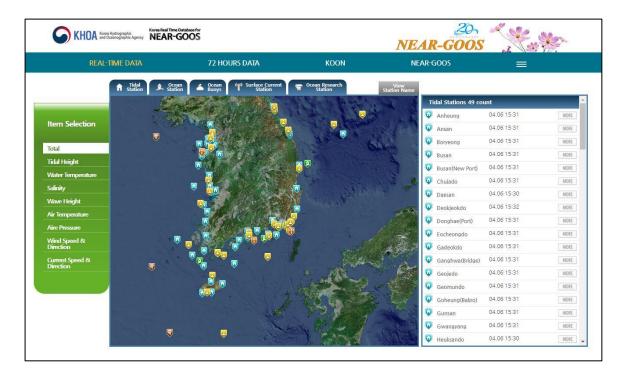

03 Service to public

□ Korea RTDB for Near-GOOS

(URL: www.khoa.go.kr/neargoos)

High Tide Information Service (URL: <u>www.khoa.go.kr/hightide</u>)

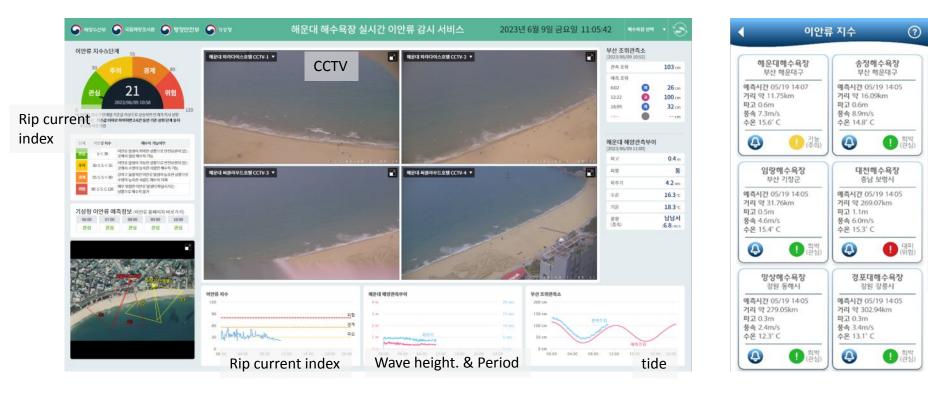

- · Normal
- Attention
- · Caution
- · Warning
- · Danger

I Rip current monitoring Service

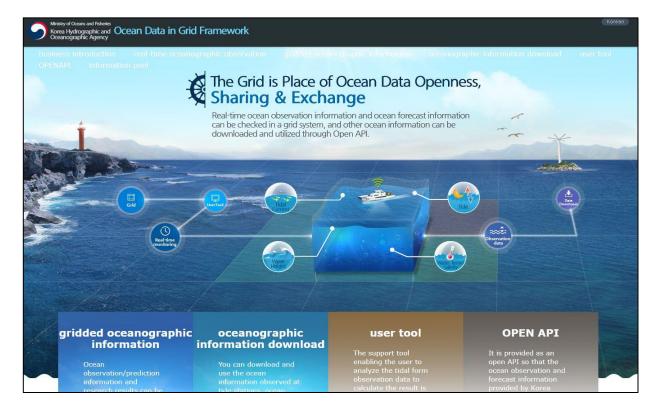

Grid Service – Sea fog station (URL: <u>www.khoa.go.kr/oceangrid</u>)

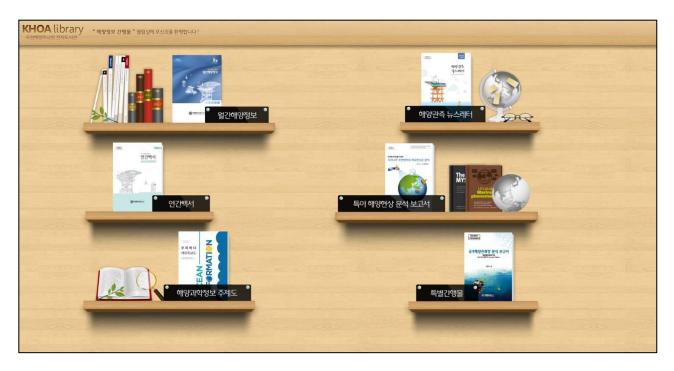

Grid Service (URL: www.khoa.go.kr/oceangrid/khoa/intro.do)

□ Webzine

(URL: www.khoa.go.kr/webzine/webzine.do)

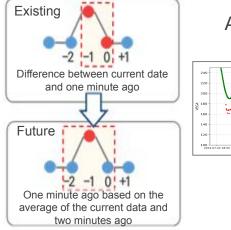

18/19

04 Future plans

□ Real time QC Improvement

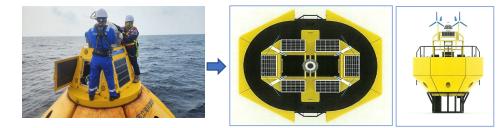

• QC algorithm improvement

Application of jump value inspection

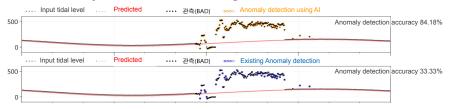

Conservation Data ~ VEGA 00. ((C224))

Buoy design improvement

⇒ Enhancing maintenance stability

· Anomaly detection using AI

 \Rightarrow Improved anomaly detection accuracy with AI application

Thanks! Any questions?
